

SUSTAINABILITY

# ACHIEVING SUSTAINABILITY THROUGH THE POWER OF RENTAL

WE MAKE SUSTAINABLE AND INNOVATIVE PRODUCTS ACCESSIBLE

# YOUR PARTNER FOR ACHIEVING A MORE SUSTAINABLE FUTURE THROUGH THE POWER OF RENTAL

---

Investing in our people, customers, and communities is at the core of what we do. From enabling our skilled, diverse workforce to deliver the best customer service to sourcing the latest low and zero carbon emission equipment, we are continuously improving our daily operations and sustainability efforts. As a leader in the rental industry, our actions play a critical role in building a successful economy and a healthy planet not only today but also for generations to come.

# INNOVATIVE, LOWER-EMITTING SOLUTIONS TO HELP MEET YOUR GOALS

HIGH-PERFORMING  
EQUIPMENT & SOLUTIONS

REDUCE FUEL  
CONSUMPTION

ELIMINATE  
EMISSIONS

DECREASE  
NOISE POLLUTION

## LOWER-EMITTING OPTIONS

Battery Energy Storage Systems

Electric Mini Excavators

Scissor Lifts

Skid Steers

Solar Light Towers

Submersible Pumps

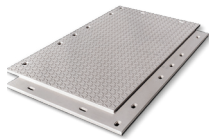

Telehandlers

Vehicles

## OTHER SUSTAINABLE PRODUCTS

Composite Ground Protection

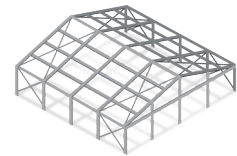

Reusable Containment Walls

Scrubbers  
with cleaning pads to use less water

Temporary Fencing

Temporary Structures

**We are a company of problem-solvers committed to INNOVATION.**

Our team is dedicated to providing innovative, high-performing sustainable solutions that help solve emissions challenges. We are partnering with equipment manufacturers to create the fleet of the future. Together, we're helping you reduce fuel consumption and emissions, and decrease noise pollution — all while meeting or exceeding equipment performance standards.

## CASE STUDY: USING BATTERY ENERGY STORAGE SYSTEMS TO SUSTAINABLY POWER CONSTRUCTION SITES

Construction sites need power to operate and often rely on diesel generators to supply that power. For example, a jobsite trailer typically has a 20-kW generator running to support power needs but consumes less than 10 kW during peak daytime use and even less in the evening. It still runs 24/7, consuming fuel, releasing emissions, and making noise.

Battery energy storage systems are great solutions to help provide the power needed throughout the day more efficiently and quietly. This system collects the excess power from the generator and stores the energy for later use, such as at night when the overall demand is lower. The generator restarts when batteries are depleted or when the energy load exceeds what the unit can support.

Data from a jobsite with 15 units deployed showed the following results over a 28-day cycle and per unit:

### Run Hours

540 hours of runtime eliminated per cycle per unit

### Fuel

456 gallons of fuel eliminated per cycle per unit

### Fuel Cost

\$2,508 in fuel cost eliminated per cycle per unit when fuel was \$5.50

### CO<sub>2</sub>

3,140 kg of CO<sub>2</sub> eliminated per cycle per unit

### Preventative Maintenance

435 service hours and 399 gallons of oil eliminated

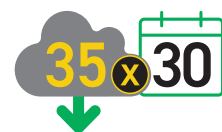

# EMBEDDING SUSTAINABILITY INTO DECISION-MAKING

**We set targets to improve our environmental footprint and do our part to help address climate change.**

- Executed green power purchasing contracts that account for an estimated 10 million kW of electricity annually
- Actively acquiring additional renewable energy credits, striving for 100% renewable electricity by 2030
- Electrifying our pickup truck fleet, with the goal of continued investments in the future
- Making deliveries more efficient, resulting in fewer miles driven
- Beta-testing several Class A tractor-trailers in California
- Installing energy-efficient LED lighting to reduce the kilowatt hours for lighting by 60%

## Sustainability Goal

Decrease our carbon intensity by 35% by the year 2030, with a shorter-term goal of reducing our carbon intensity by 15% by 2024.

PROVIDING OPPORTUNITIES FOR OUR  
TEAM MEMBERS AND COMMUNITIES  
TO GROW AND THRIVE

### A Culture of Integrity

Our expectation of ourselves and our business partners is to do what's right and to act with integrity — always with the promise to customers to deliver availability, reliability, and ease.

### Commitment to Safety

With a focus on proper training, we engage in all activities safely and work together to reduce risk, ensuring that everyone goes home from the job uninjured every day.

### Supporting Team Member Development

We continuously invest in our team members' personal and professional growth, and their success is critical to our ability to deliver for our customers. At all levels of the business, we prioritize opportunities for team members to enhance their skills and grow their careers.

### Diversity, Equity, Inclusion

We strive to cultivate a diverse and inclusive workplace where every team member feels valued, respected and can thrive. As one team, we believe fully embracing our many differences promotes creativity, fuels innovation and strengthens team member engagement. In recognizing the diversity of our workforce, we maximize the strength of our organization to positively influence the communities in which we live and work.

### Empowering Communities

What we do every day matters. We strive to have a positive impact and do this through creating jobs, supporting nonprofit organizations, and volunteering. We help enable entrepreneurs and small businesses to grow, and together with our customers, we help build thriving communities.

### Veterans Program

We actively recruit members of the armed forces and support them with veteran-specific resources, recognizing their service and sacrifice.

### Emergency Response

We react, rebuild, and restore communities following natural disasters at times of crisis. Our emergency response team activates in response to weather-related disasters, such as hurricanes and tornadoes, fires, floods, and snowstorms, or other emergency situations where communities need rapid support.

## Giving Back

We are proud supporters of both local and national organizations, including the Gary Sinise Foundation, the American Red Cross, and Habitat for Humanity Canada.

Let our team of equipment experts consult with you to create tailored solutions to meet your sustainability goals, wherever you may be on your journey. Visit [sunbeltrentals.com](https://www.sunbeltrentals.com) to learn more.
